

## **MACHINERY LUBRICATION TRAINING**

Asset Reliability conducted Machinery Lubrication Training at the National Petrochemical Industrial Company (NATPET) in Yanbu, Saudi Arabia. The training focused on key techniques for ensuring optimal machinery performance and longevity through effective lubrication practices.

## **TURBINE OIL VARNISH REMOVAL**

Asset Reliability successfully deployed the SVR1200 skid to ADNOC UAE, utilizing ICB technology to address oil varnish accumulation in turbo-compressor systems. This groundbreaking solution removes soluble varnish, enhances equipment reliability, boosts operational efficiency and contributes to environmental sustainability.

## **MACHINERY LUBRICATION TRAINING**

Asset Reliability accomplished Machinery Lubrication training at Crown Plaza Hotel Sohar, Oman on 7th September 2023. This training shared knowledge which will make a significant impact on machinery performance and reliability at industries.

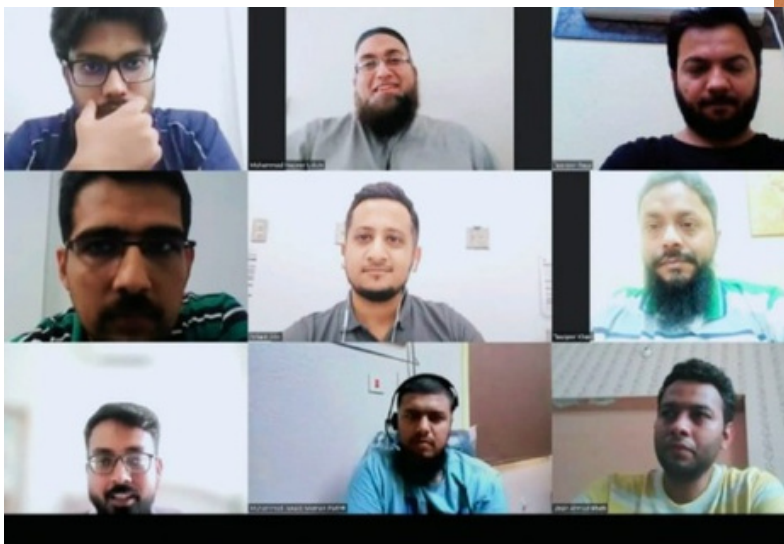

### **VARNISH REMOVAL SERVICES**

Uptime Technologies recently installed HYPRO SVR1200 skid effectively combated oil varnishing in turbine systems at a fertilizer plant in Punjab, Pakistan. This proactive measure not only prevented oil varnish-related failures but also boosted machinery reliability.

### **OIL ANALYSIS SERVICES**

Uptime Technology provides onsite oil analysis services using portable oil testing kits to monitor equipment condition. The testing includes particle count, kinematic viscosity, water content (ppm), density and debris monitoring.

### **CERTIFIED MAINTENANCE AND RELIABILITY PROFESSIONAL (CMRP)**

We are thrilled to highlight the success of our recent CMRP online training, organized by Asset Reliability, which brought together maintenance and reliability professionals from around the world. Participants hailing from diverse regions such as Canada, Saudi Arabia, Pakistan, Oman, UAE, and Qatar joined us for this enriching experience. This global participation underscores the growing international reach and impact of our training initiatives, fostering a community of excellence in maintenance and reliability practices on a global scale.
